DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly

claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 3, 4, 9-14 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph. Dependent claims 3, 4, 9-14, inherit the deficiencies of the independent claim 1.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wood (USP 5,805,433). Wood (see figure 3) discloses a DC/DC converter circuit with high side (1) and low side transistors (2), a PWM (104) controlled output, and a sensor for detecting a level of an intermediate node potential (VS) at a junction point f the high side and low side transistor.
